NO ONE BRINGS IT ALL TOGETHER LIKE LOCHINVAR

Lochinvar is the industry leader that other leading companies call upon for the most advanced and efficient water heating products in the world. For that reason, Lochinvar is trusted to go beyond the call of duty to find a solution for every project, no matter the size. You will not find a water heating company that works harder or cares more.

That's why no one brings it all together quite like Lochinvar.

A HISTORY OF INNOVATION

For nearly 80 years, Lochinvar, an American company, has been a leader of innovation and high-efficiency water heating. Through Lochinvar's pride in leadership and commitment to excellence, the company has continually improved year after year.

Today, Lochinvar touts the broadest line of high-efficiency water heating solutions, a world-class research & development department, comprehensive service with every sale and industry-leading training through Lochinvar University.

AN INDUSTRY LEADER IN THE MAKING, 1954.

POWER-fin®

THE ORIGINAL BOILER CONTINUES TO SET THE STANDARD

In 1986, Power-Fin® redefined the industry with its space-saving design, groundbreaking efficiency and venting flexibility. Now, over 30 years later, we continue to raise the standard with an easy to operate touch screen user interface, remote boiler control and enhanced communications. The advanced Smart Touch™ color display includes CON•X•US® remote connectivity via WiFi or Ethernet for easy control at your fingertips, from anywhere. And a simple drop in Modbus or BACnet card allows for easy integration into a Building Management System.

ENHANCED OPERATING CONTROL

The Power-Fin now offers the industry-best Smart Touch™ 8" LCD full color touchscreen with easy-to-understand info-graphics. It is equipped with CON•X•US® connectivity that lets you remotely monitor and optimize the performance of the entire boiler plant.

Starting with the introduction of Power-Fin product line in 1986, we were able to provide something that other companies weren't focused on, efficiency and footprint.

BURNER MODULATION BOOSTS EFFICIENCY AND LOWERS COSTS

With thermal efficiencies of up to 87%, Power-Fin boilers feature a 5:1 turndown ratio that will precisely match the firing rate to heating load requirements—at any point from 20% to full firing rate. This results in less equipment cycling for greater efficiency and cost savings.

READY FOR OUTDOOR INSTALLATION

In warm-weather sites where the mechanical room is overcrowded, the Power-Fin can be easily installed either outdoors or on a rooftop. The outdoor hood and screen protector make outdoor installation fast and trouble free.

VENTING SOLUTIONS

The Power-Fin offers seven venting options for ease of installation and flexibility to meet the most challenging installation requirements. The

Power-Fin permits air intake and exhaust terminations to be horizontal through a sidewall or vertical through a roof. Consult the installation and operation manual for detailed venting guidelines.

PEACE OF MIND, WHEN IT MATTERS MOST

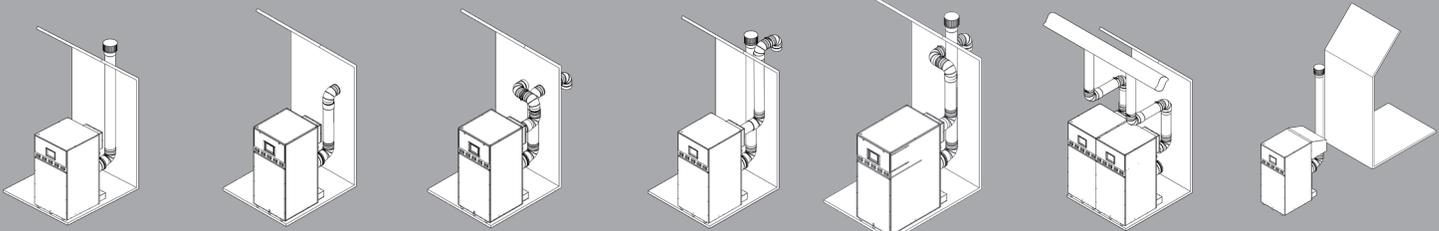

Cascade Redundancy provides peace of mind because it helps ensure that a Power-Fin boiler system will always deliver reliable performance with no downtime. If the lead boiler is turned off for maintenance, Cascade Redundancy automatically shifts the lead role to the second sequenced boiler. Up to eight Power-Fin boilers can be sequenced using a 2-wire daisy-chain connection. Cascade sequencing can be programmed for Lead-Lag or Efficiency Optimized operation.

With Lead-Lag operation, one lead boiler modulates to capacity on demand. As load increases, the system

then cascades to additional lag boilers in sequence. The first-on role shifts daily, distributing equal run times to each unit.

In an Efficiency Optimized system (see illustration left), all boilers fire and modulate simultaneously at the same Btu/hr input rates.

STANDARD FEATURES

- 85% Thermal Efficiency
- Outdoor Ready
- Modulating Burner with 5:1 Turndown
 - Hot Surface Ignition
 - Low NOx Operation
 - Sealed Combustion
 - Low Gas Pressure Operation
- Vertical & Horizontal Venting
 - Venting up to 50 Feet
 - Category I or Category IV Venting
- ASME Copper-Finned Tube Heat Exchanger
 - ASME Certified, "H" Stamped
 - Gasketless design
 - 160 psi working pressure
- On/Off Switch
- Adjustable High Limit w/ Manual Reset
- Flow Switch
- Low Air Pressure Switch
- Downstream Test Cocks
- 50 psi ASME Relief Valve
- Combustion Air Filtration
- Temperature & Pressure Gauge
- Zero Clearances to Combustible Material
- High Altitude Models Available
- 1 Year Warranty on Parts
- 10 Year Limited Warranty (See Warranties for Details)
